

ALUMINUM FLASHLIGHTS

SHERWOOD SCUBA

PartNumbers:

ST 1 0 0 0

ST 2 8 0 0

USER'S MANUAL

ST1000

ST2800

INCLUDED ITEMS

ST1000 = 1000 lumen light | ST2800 = 2800 lumen light

USB charging cable

Lithium-ion battery

Spare O-ring seal

Wrist lanyard

Reusable zippered case

Important Prior To Use:**O-RING SEAL**

Inspect the O-ring seal to be sure it is clean and free of dust, debris, hair, sand, etc. before using underwater. Lightly lubricate the O-ring seal with silicone grease prior to use and maintain lubrication at all times.

RECHARGING LITHIUM-ION BATTERIES

WARNING: DO NOT RECHARGE THE BATTERY NEAR FLAMMABLE ITEMS AND/OR PRODUCTS. Do not leave plugged in for more than 12 hours.

- Unscrew the end cap.
- Plug in USB cable.
- A red LED indicates that the light is charging.
- When charging is complete, the LED turns green.
- Fully screw down the end cap.

WARNING: When using rechargeable lithium-ion batteries use only the included batteries or batteries sold by major manufacturers that have the same voltage, mAh and watt hour ratings as original batteries. Batteries must include over / under voltage protection circuit.

RECHARGEABLE BATTERIES

Burn time/Brightness:

ST1000 - 1.0 hr at 100%, 2.0 hr at 50%, 3.5 hr at SOS Strobe, 7.0 hr at 25%

ST2800 - 1.5 hr at 100%, 2.5 hr at 50%, 2.0 hr at SOS Strobe

Burn-time of the lamps is affected by:

(A) - *Operating temperature* – Do not use at highly elevated temperatures for extended periods of time.

(B) - *Storage temperature* – Store in a cool and dry place at room temperature (68-77° Fahrenheit / 20-25° Celsius).

(C) - *Time period the light was out of use.* For extended storage, discharge a lithium-ion battery to about 40 percent (or approximately 1 hour on a fully charged battery) and store it in a cool, dry place. **Warning: *always take batteries out of light when storing longer than 30 days.***

(D) - *Avoid completely discharging lithium ion batteries* – Battery experts suggest that after 30 charges, you should allow lithium-ion batteries to almost completely discharge. Continuous partial discharges create a condition called digital memory, decreasing the accuracy of the device's power gauge. So let the battery discharge to the cut-off point and then recharge. The power gauge will be recalibrated. For safety reasons, do not recharge deeply discharged lithium-ion batteries if they have been stored in that condition for several months.

BATTERY DISPOSAL

Rechargeable lithium-ion batteries must be disposed of or recycled in compliance with all applicable laws.

Never throw into a fire, as batteries may explode. Keep batteries away from children

WARNINGS

- Light is for underwater use only.
- Remove the batteries during transport.
- Remove the batteries if the light will not be used for long periods.
- If you anticipate extended periods of non-use, recharge the battery every 3 months.
- Make sure the end cap is closed tightly before each dive.
- Never point the light directly into eyes.

CHARGE INDICATION SWITCH

This light features a color charge indication around the on/off switch with multiple modes. The light works at 100% power, 50% power, and SOS signaling modes. Push the on/off button and release to move between modes. After four seconds of use in any mode pushing the power button will power off the light. This light features a battery life indicator around the on/off switch. It glows green at full battery charge, yellow at half battery charge and red at low battery charge. It will flash red before shutting off.

ROUTINE MAINTENANCE

- **After every dive, wash thoroughly in fresh running water to remove any sand as well as dirt and salt.**
- **NEVER disassemble the light.**
- **Periodically check the condition of the O-ring seal and lubricate with silicone grease on a regular basis and replace as needed.**

WARRANTY

We want you to be 100% satisfied with your purchase. If for any reason your light fails or malfunctions, you can return it within 12 months of consumer purchase for repair and/or replacement. **Proof of Purchase from an authorized dealer within the past 12 months must be included with all warranty returns.** Please return your light to the place of purchase. Commercial and rental use is not covered. Any lights or batteries that have been disassembled void warranty. Warranty is not transferable.
